

1. Follow the link to the NIHR GCP e-learning homepage
http://www.crn.nihr.ac.uk/workforce_development/learning_and_development/gcp/gcp_elearning
2. Click on 'LOG IN TO THE LMS' link at the bottom of the page

The course will take about 30-45 minutes to complete. If you are very familiar with the requirements and practical application of Informed Consent with Adults Lacking Capacity it is possible to complete the course in less time. However, we still recommend you dedicate 30-45 minutes in order to fully engage with the course materials.

Further information

These courses have been specifically designed to focus on the practical application of Good Clinical Practice (GCP) in the conduct of research in the NHS and is aimed at people who are recruiting participants and gathering study data in local research sites.

The content will be useful to those people who are involved in other aspects of research, such as designing and managing studies and those with Sponsor or Chief Investigator responsibilities, but it will not prepare you specifically for those roles.

The content of the e-learning courses is based on the successful and well-established taught [Introduction to GCP workshops](#). It is designed to blend with locally delivered taught courses including the [GCP Refresher](#).

Individuals who have contributed their expertise and advice to this course can be found in [Acknowledgements and Contributions](#).
